Mr. T. Nelson
Systems Consultant
Box 32
Schooley Mountain
New Jersey

Dear Mr. Nelson:

Thank you for your response to our ad in Datamation requesting additional information.

The enclosed material outlines the many advantages of our new and unique service, and describes our capabilities.

Our customers furnish us with data on punched cards or magnetic tape, or, if necessary, copy which we punch into cards. We do the editing and programming necessary to provide desired type faces, point sizes and format.

Our output is a positive film image of the typeset material in page or galley form, which can be used to prepare a negative, a reproduction proof or converted directly to a printing plate. Our only business is computer controlled phototypesetting. We don't sell equipment. We are not printers.

The cost of our service depends on the nature of the material. We suggest you send us samples of material you have in mind, and we will give you specific cost information. You may be able to make substantial savings.

Sincerely,

DATAGRAPHICS, INC.

A handwritten signature in dark ink, reading 'Ralph L. Sieben'. The signature is written in a cursive, flowing style.

Ralph L. Sieben

**A NEW SERVICE...QUALITY
TYPESETTING DIRECTLY FROM
DATA PROCESSING SYSTEMS**

DATAGRAPHICS

Computer Typesetting gives you...

A wide variety of type styles and sizes, mixed
as required within a line.

Capitals and lower case letters from material
that does not have shift coding

A full range of punctuation and special sym-
bols

Complete page makeup by computer

...all without keyboard operation, proofread-
ing, pasteup, stripping or extra camera work!

If you publish computer-based material, or if
you have complex tabular information
manually typeset, our service offers a unique
combination of **QUALITY, SPEED, ACCU-
RACY AND ECONOMY.**

DATAGRAPHICS TYPESETTING

DATAGRAPHS CAPABILITY

Datagraphics is **today** doing computer phototypesetting at the rate of 86,400 characters per hour.

Datagraphics has programs which can be tailored to convert your punched cards or magnetic tape through our equipment to type.

The equipment we now have in our plant is an IBM 1440, Photon 560's, and a Photon 200.

Datagraphics' system combines the flexibility and speed of data processing with the high quality achievable from phototypesetting.

Datagraphics specializes in photocomposing material such as:

- parts lists
 - price lists
 - directories
 - catalogs
 - other listings

Datagraphics' computer typesetting programs provide:

- Justification, with or without letter spacing
 - Quadding left, right or center
 - Insertion of leaders
 - Logical or coded capitalization
 - Roman, italic and bold
 - Mixture of type styles and sizes
 - Automatic page makeup
 - Editing of input to achieve graphic quality

Datagraphics has many type faces and it is possible to phototypeset, economically, up to 192 fonts on one page.

The output from the Photons is positive film, either in page format with running heads and folios in place, ready for plate making, or in galleys ready for page makeup. We also can convert these to page negatives.

In general, the larger the job the better it fits our system.

We would be pleased to consult with you about your specific typesetting requirements. Please feel free to write or call so that we may be of service to you and your organization.

DATAGRAPHS, INC.

QUALITY • READABILITY AND ECONOMY

are all vitally important to your publication program. Your printed materials project an image of your company, its products and services. Only high quality publications can provide the impression you want and need. Readability is important not only for the benefit of the observers' impressions, but also because it helps your readers to work easily, quickly and accurately, without fatigue or frustration. Economy needs no justification.

COMPUTER PRINTOUT is cheap, and looks it. Smudgy characters, uneven lines and lack of typeface variation all contribute to an impression of dullness and poor quality. Readability is poor, and made even more difficult by limited punctuation and special symbol characters.

PHOTO-LISTING requires manual keyboard operation, yet this process can never provide high quality. Variations in typewriter type styles and variable line spacing during photography makes quality appearance impossible.

CONVENTIONAL TYPESETTING is slow, expensive and error-prone. Further, later editions may incur type-matching problems, page forms are subject to deterioration through damage or loss, and form storage is expensive.

NOW... COMPUTER TYPESETTING GIVES YOU QUALITY • ACCURACY • SPEED AND ECONOMY

QUALITY is one of the outstanding characteristics of phototype-setting. Each letter is photographed with a micro-second flash, giving crisp, sharp, even, reproducible type.

READABILITY is enhanced by clarity, a mixture of type styles and sizes, both upper- and lower-case letters, and a full range of punctuation and symbols.

SPEED AND ACCURACY are assured by an all-computer operation, which can start with information directly from a data processing system.

ECONOMY is the result of reducing the number of pages that must be printed and elimination of manual operations. Complete page make-up is accomplished entirely by computer. No stripping, pasteup or extra camera work are necessary. Condensed typefaces put more material on a page, and thus the overall cost of the publication may be substantially reduced, while legibility is improved.

These pages suggest the variety of work that can be handled by our computer typesetting systems.

If you are not entirely satisfied with the quality, speed, accuracy nor cost of your publications, let us show you many advantages of computer typesetting.

February 18, 1965

Mr. T. Nelson
Systems Consultant
Box 1546
Poughkeepsie, N. Y.

Dear Mr. Nelson:

Thank you for your interest in our computerized typesetting services.

Our system combines the flexibility and speed of data processing with the improved quality achievable from typesetting. Datagraphics specializes in photocomposing material such as directories, catalogs, parts and price lists, and other types of printed listings.

Our typesetting programs provide:

- . justification, with or without letter spacing
- . quadding left, right or center
- . insertion of leaders
- . logical or coded capitalization
- . bold and light face
- . mixture of type styles
- . page makeup

Datagraphics uses Photon 560 phototypesetting equipment. We have available over 60 type faces with a wide range of special characters and can set type in sizes from 6 to 72 point.

The output from the Photons is positive film, either in page format with headings, and page numbers or in galleys ready for page makeup.

As input to our system, we can use your punched cards or magnetic tape in their present format. Our programs can select and edit information before entering the typesetting phases.

Mr. T. Nelson

Page 2

The cost of our service depends to a considerable extent upon the nature of the specific job, but is usually in the range of \$1.50 to \$3.00 per thousand characters.

We are enclosing a sample to give you an idea of the kind of quality produced by Datagraphics.

If you have a possible application for computer typesetting, we would be glad to provide more specific information.

Very truly yours,

DATAGRAPHICS, INC.
